Suraj Yadav

surajyadav200701@gmail.com — +91-7986068817 — suraj-yadav0.github.io — suraj-yadav0

Technical Skills

Languages: Python, JavaScript, Dart, QML, C++, SQL, HTML5, CSS3
Frameworks & UI: Flutter, Qt Quick, Lomiri, Node.js, Express.js, Riverpod, GetX
Databases & Storage: PostgreSQL, SQLite (Drift), MongoDB, Firebase Firestore
Tools & Platforms: Linux (Ubuntu, Ubuntu Touch), Git, Docker, Clickable CLI, ONNX Runtime, REST APIs, CI/CD

Professional Experience

Junior Software Engineer — March 2025 – Present

CALIN Global Services India PVT LTD — *Kerala, India*

- Engineered convergent Ubuntu Touch applications using QML, Qt Quick, and Python (PyOtherSide), sustaining 60 FPS rendering across handheld mobile screens and 4K external desktop displays.
- Architected Time Management app synchronizing with multi-server Odoo ERP instances via REST APIs, eliminating duplicate billing over unstable connections using an idempotent offline SQLite ledger with UUID keys.
- Co-authored official Lomiri App Development Level 1 & Level 2 engineering curricula, training developer teams on QML application architecture, Clickable CLI workflows, and AppArmor sandboxing.
- Secured client authentication workflows with OAuth 2.0 and JWT token lifecycles under AppArmor confinement, while contributing 10 upstream merge requests into Ubuntu Touch's Dekko 2 email client.

App Developer Intern — April 2024 – August 2024

NotAtMrp — *Remote*

- Accelerated application responsiveness by 30% and cut user wait times by 70% by migrating client state to GetX reactive architecture and implementing structured data-flow caching in Dart.
- Decreased checkout bounce rate by 25% and lifted user engagement by 35% by redesigning retail checkout workflows with responsive Flutter UI components.
- Reduced server round-trip latency by 20% by conducting Flutter DevTools performance profiling and optimizing REST payload serialization.

Projects

Quantro – Smart Finance | *Flutter, Drift SQLite, Riverpod, Firebase* | Demo | Code — **2026**

- Architected local-first finance app delivering sub-5ms transaction search queries by designing type-safe compiled Drift SQLite DAOs with compound indexing on transaction timestamps.
- Parsed 200+ Indian banking SMS formats (UPI, NEFT, IMPS) with zero UI frame drops by offloading automated regex tokenization to a dedicated background Dart isolate, backed by Firestore delta sync.

UTGPT – On-Device AI Assistant | *QML, Python, llama.cpp, GGUF, Lomiri* | OpenStore | Code — **2026**

- Published private on-device AI chat app on OpenStore, streaming local tokens without UI thread blocking by interfacing 4-bit quantized GGUF models (Qwen 2.5, SmolLM2) via async UNIX domain socket IPC.
- Guaranteed conversational privacy and zero telemetry by enforcing strict AppArmor sandbox confinement profiles on Ubuntu Touch.

Tower Crash – Helix Jump Arcade Game | *QML, Qt Quick, JavaScript, SQLite* | OpenStore | Code — **2026**

- Published 100-level helix arcade game on OpenStore maintaining a steady 60 FPS by engineering lightweight polar coordinate collision algorithms and custom spring physics in JavaScript without heavy external physics engines.
- Increased player retention by implementing dynamic combo superfall mechanics (smashing rings after 3+ consecutive drops) and offline SQLite checkpoint persistence.

Education

Chandigarh Engineering College — Punjab, India

Bachelor of Technology in Computer Science and Engineering – CGPA: 8.52 / 10.0 — *2021 – 2025*

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering

Honors & Achievements

Competitive Programming: Solved 1,100+ DSA problems across LeetCode, HackerRank, and GeeksforGeeks; ranked in Top 6% on LeetCode with an active 650+ day streak.

Open Source Impact: Maintained 118+ public GitHub repositories with 300+ merged PRs; awarded GitHub Pull Shark ×3 and Pair Extraordinaire ×2; merged 10 upstream MRs into Dekko 2.

Leadership & Hackathons: Served as Developer Lead at D4 Community mentoring junior engineers and hosting technical workshops; Grand Finalist in Smart India Hackathon and winner of 2 institute hackathons.
